

GC/Waldom

Continuity Tester

12-105

Clip lead to circuit and use needle point to test. Light "on" indicates circuit continuity. Light "off" indicates fault in circuit. Forty-two inch lead with alligator clip for ground connections. Large red lens. Requires 2 "AA" batteries (not included).

Hi-Voltage Testing Screwdriver

5120

A combination screwdriver and electrical tester that checks AC voltages from 100 to 500 volts. Pocket size. Only 9/16" O.D. and 5-5/16" long. Simple to use in tracing all types of trouble such as grounded lines, open or short circuits.

Receptacle Testers

Receptacle Tester

61-500

Warns against faulty wiring in 3-wire receptacles. For use on 125 VAC circuits. One year warranty.

E-Z Check® Plus GFI Receptacle Tester

61-501

Tests GFI receptacles for proper operation. Warns against faulty wiring in 3-wire receptacles. For use on 125 VAC circuits. One year warranty.

E-Z Check® Plus Circuit Identifier

61-052

Positively identifies circuit breakers and fuses without service interruption. Plug-in transmitter identifies and troubleshoots 120 VAC, 3-wire outlets. Checks proper wiring sequence and GFI operation. Hand-held receiver with adjustable sensitivity level. Visual and audible indicators. One year warranty.

Circuit Identifier

61-510 Circuit identifier
61-560 Adapter set

Positively identifies circuit breakers and fuses without service interruption. Hand-held receiver with adjustable sensitivity level. Visual and audible indicators. One-year warranty.

Receptacle Testers cont'd

Stop Shock™ Ground Circuit Tester

61-511

Verifies safe low impedance ground. Flashing light indicates defective/hazardous ground. Warns against faulty wiring in wall outlets, multiple outlet strips or extension cords. One year warranty.

E-Z Check® Receptacle Circuit Tester

61-035 Receptacle circuit tester

61-051 Plus GFI tester

No-slip ergonomic design maximizes comfort. Premium neon lamps prevent false readings. Tough impact-resistant case. Fast and simple testing and fault identification in 3-wire, 125V circuit - without probes or meters. Tests for open ground, reverse polarity, open hot, open neutral, hot and ground reversed, hot on neutral and hot open. Ideal E-Z Check® Plus intentionally overloads the actual GFI breaker to test its mechanical operation in addition to checking for proper wiring sequence. NOTE: Do not use on circuits employing isolation transformers. Two year warranty.

Stat-Gard™ ESD Ground System

61-046 Includes grounding plug, large wrist strap and 10 ft. lead set

61-038 Grounding plug

61-045 Adjustable wrist strap

61-039 10ft. lead set

Unique static-prevention system uses hard ground of electrical system to drain static charges. Checks ground circuit for any common ground faults - bright neon light provides visual proof of ground. Wrist strap with stainless steel backplate and conductive fiber provides maximum absorption of static charges. One year warranty.

Non-Contact Voltage Testers

Voltage Detector

61-512

Tests voltages from 100V to 600V AC. Audible and visual indication. Thumbwheel power/sensitivity switch. One year warranty.

Metal and Voltage Detector

61-514

Tests voltages from 100V to 600V AC. Locates pipes, reinforced steel and other similar metals in walls. Locates live cable in walls. Finds breaks in cables. Tests fuses in holders without unplugging. Audible and visual indication. One year warranty.

Powr-Glo™ Pocket Tester

61-060 Powr-Glo™ electronic voltage detector

61-061 Powr-Glo™ audible electronic voltage detector

61-201 Replacement battery

Checks voltage from 12 to 440 AC or DC without contact on electrical lines. Unique sensor locates breaks along live, insulated wires and power cords. Checks for energized AC circuits, distinguishes polarity and detects leaks in ungrounded devices. UL listed.

61-061

Circuit & Voltage Testers

Continuity Testers

Continuity Tester 61-030

Pocket-size tester designed for use on electrical control equipment and panel-board wiring. Checks continuity of dead circuits, grounds on conduit systems and identifies wires in multi-wire cables. Light signal indicates completed circuit. Bulb in end can serve as flashlight. Pocket clip functions as probe. Removable 4-ft. test lead with alligator clip. Requires 2AA batteries (not included).

Continuity Indicator 61-502

Tip light acts as circuit continuity indicator. Long test lead with alligator clip. Pocket clip functions as probe. One year warranty.

Test-Glo™ Circuit Tester 61-040

Industrial-quality tester checks voltage from 80V to 600V AC/DC. Neon test lamp at front end of prod. Resistors reduce voltage reaching leads. Twenty-four inch lead rated 10,000V. One year warranty.

Electrical Voltage Testers

Fuse Puller and Test Light 34-012

Checks voltage from 100V to 600V AC/DC. Safely pulls cartridge fuses. Test prods fit parallel and tandem slot receptacles. Built-in resistors limit current flow to eliminate false indication. For 9/16 inch to 1 inch fuses, 100A/250V and 60A/600V. One year warranty.

Test-N-Light™ Screwdriver 61-062

Checks voltage from 50V to 600V AC. Test light in handle flashes red when tip contacts voltage. 600V insulated screwdriver. Universal 6" x 1/4" cabinet tip. Hardened-steel blade. One year warranty.

Twin Lead Tester 61-503

Checks voltage from 80V to 500V AC/DC. Heavy-duty test probes. One year warranty.

Four-Way Electrical Tester 61-504

Checks 110V, 220V, 277V and 460V AC/DC. Individual resistors and bypass resistors for each voltage range. One year warranty.

Screwdriver Tester 61-505

Tests voltage, continuity and polarity. Checks voltage from 1.5V to 250V AC/DC. Convenient screwdriver tip. One year warranty.

Electrical Voltage Testers cont'd

Vol-Test™ Pocket Tester 61-050

IDEAL Vol-Test™ is an electronic pocket tester with screwdriver probe performs continuity, polarity and voltage testing to verify electrical connections. Automatic safety feature switches electronically between voltage and continuity. Checks 12 to 440V. UL listed.

Solenoid Voltage Testers

Voltage Tester 61-065

Extremely rugged and reliable. Solenoid indicator and neon test lamp provide double protection. Tests 100V to 600V AC/DC (25 to 60Hz). Independent circuitry provides a built-in backup safety system. Replaceable leads with shielded probe tips. Two year warranty.

Voltector™ Voltage Tester 61-515

Tests voltage from 120V to 600V AC/DC. Integral prod storage. High-impact case. One year warranty.

Vol-Con® Voltage Testers

- 61-076 Vol-Con® with standard leads
- 61-079 Vol-Con® with slim-line leads
- 61-080 Vol-Con® with resistor-fused leads
- 61-020 Premium leather case
- 61-009 Vinyl case
- 61-010 Standard leather case

Multifunction solenoid device operates as three testers in one. Heavy-duty voltage tester tests up to 600V AC or DC. Low-voltage indicator tests as low as 5V AC or DC. Patented, automatic switching continuity tester protects against contact with live voltage. Built-in safety check for testing leads. Bright, long-life LED and neon indicator lamps. Replaceable plug-in leads for quick and easy changes. Flexible 30 inch, oil-resistant vinyl leads with right-angle plug for strain relief. Rugged, high-impact case with ultrasonically welded seams to protect against dust and moisture. Batteries included. Convenient, snap-out battery replacement.

Vol-Con® Lite Tester

- 61-099 Vol-Con® Lite with slim-line leads
- 61-100 Vol-Con® Lite with resistor-fused leads
- 61-101 Vol-Con® Lite Audible with slim-line leads
- 61-102 Vol-Con® Lite Audible with resistor-fused leads
- 61-083 Insulated clip lead set (1 prod and 1 alligator clip)
- 61-012 Standard leather case

Dual voltage indicators to identify AC/DC ranges from 6V to 480V AC and 120V to 240V DC. Slim-line design for easy handling and convenient pocket storage. Top-mounted lead plug assembly for reduced cord tangling. Audible indicators for AC and DC voltage detection (61-101 and 61-102). Batteries included. Convenient, snap-out battery replacement.

Circuit & Voltage Testers

Solenoid Voltage Testers cont'd

Voltage Tester

- 61-066 Voltage tester with standard leads and insulated clip
- 61-067 Voltage tester with resistor-fused leads
- 61-077 Voltage tester with slim-line leads

Solenoid indicator and neon test lamp provide double protection. Tests for 100 to 600V AC or DC, 25 to 60 Hz frequency, AC or DC identification, blown fuses, grounding and leakage. Independent circuitry provides a built-in backup safety system. Replaceable plug-in leads for quick and easy changes. Flexible 30 inch, oil-resistant vinyl leads with right angle plug for strain relief. Rugged, high-impact case with ultrasonically welded seams to protect against dust and moisture.

SureTest® Circuit Analyzers

- 61-150 ST-1, line voltage, voltage drop
- 61-151 ST-1P, line voltage, voltage drop, ground impedance, false grounds
- 61-152 ST-1D, line voltage, voltage drop, ground impedance, load on branch, dedicated circuits, isolated and false grounds
- 61-156 ST-1THD, event recording, true RMS, harmonics, power factor, line voltage, voltage drop, ground impedance, load on branch, dedicated circuits, isolated and false grounds
- 61-157 ST-1THDC, true RMS current measurements, event recording, true RMS, harmonics, power factor, line voltage, voltage drop, ground impedance, load on branch, dedicated circuits, isolated and false grounds

Identifies and locates loose wire connections, bad splices/receptacles and high resistance grounds. Verifies proper wiring and GFCI operation. Tests line voltage and voltage drop under actual 15 ampere load. Large, easy-to-read LED display.

BQ-600A 3194

Accurate, hand-held digital voltmeter designed to measure 6, 12, 24 and 48-volt batteries. Also checks the charging system of vehicles as well as computerized fuel, ignition and catalytic converter systems. Includes positive test lead, negative terminal and instruction manual.

The Terminator 3310

Provides a balanced termination on the telecommunications transmission lines. The terminator is used in conjunction with a loop tester with a circuit noise measuring feature or a similar testing device. Permits the user to determine the magnitude of the longitudinal balance and the direction of the unbalance. Dial through provisions. One year warranty.

AC/DC Voltage Testers

9603 Volt-Bug 1

Tests from 100-250 volts AC/DC. Large, high visibility neon indicator positively identifies the presence of voltage. Probes snap on housing for easy one-hand testing of outlets. Convenient pocket-sized tester. Durable ABS housing. No batteries required. UL Listed. One year limited warranty.

9605 Volt-Bug 2 Dual Level

Test from 100-300 volts AC/DC. Large, high visibility neon indicators positively identify the presence of voltage at two levels. Probes snap on housing for easy one-hand testing of outlets. Convenient pocket-size. Durable ABS housing. No batteries required. UL Listed. One year limited warranty.

Sniff-It AC Voltage Detector

9600

Provides an easy and economical way to check for AC voltage. Safe, non-contact voltage probe. Test for the presence of AC voltage on: outlets, circuit breakers, extension cords, light switches, power tools and AC motors. Checks 50 to 600 volts AC. Convenient pocket-size. Visual (light flashes) and audible (beeper chirps) alerts when AC voltage is present. Use to help locate breaks in wires. Quickly locates hot and neutral terminals in wall outlets. Non-contact insulated tip allows for safe troubleshooting on high voltage circuits. UL listed. Five year limited warranty.

Breaker Sniff-It

9650

Simple to use. No adjustments are necessary. Audible and visual indication. Impact resistant rubberized case. Receiver magnetically attaches to panel door. Exclusive probe design for improved sensitivity. Uses one 9 volt battery (not included). Includes receiver and 120VAC transmitter. UL Listed. Five year limited warranty.
