

BK PRECISION

Insulation Testers (Megohmmeters)

These insulation testers are intended primarily for periodic testing of industrial motors, transformers, electrical wiring and cable insulation for signs of deterioration. Low readings may indicate impending failure and permit replacement during routine maintenance rather than risking production downtime. Also useful for safety testing of TV sets and appliances to assure no hazardous leakage current. One year warranty.

- 300 1000V, 2000MΩ
- 305 500V, 1000MΩ

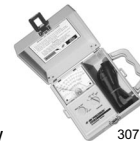

Test insulation resistance. Measure AC voltage to 600V. Battery powered. Includes batteries, carrying case, test leads and instruction manual.

BK PRECISION

Insulation Testers (Megohmmeters) (cont.)

- 307 1000V, 200MΩ
- 308 1000V, 2000MΩ

Selectable 250V, 500V or 1000V insulation tester. Low resistance test. Extra rugged integral carrying case. Live circuit indicator warns of safety hazard. Push to test. Includes batteries, integral carrying case with strap, test lead and instruction manual.

BK PRECISION

Audio/Video Testers

BK PRECISION

Video Monitor Tester

1280A
Designed to test both Mac and PC monitors. All patterns can be manually selected or place the unit in Auto for automatic cycling of each available pattern. Designed to test (burn-in) one to four monitors, the unit can also be used as a display generator. Full color - green, blue, red, black and white. Sixteen monitor types/resolution selections. Color bar, cross hatch, dot, raster, Windows® selection. VGA, SVGA, RGB, HV, V and four DB-15 (rear panel) for multiple monitor burn-in. Included BE-12 AC adapter. One year warranty.

1275
Handheld unit to test PC and Mac monitors. Small, portable unit generates crosshatch, dots, color bars and raster patterns in green, blue, red, black and white. CGA, VGA and SVGA. Standard DB-9, DB-15 and DB-15 Hi-res mini connectors. Nine volt battery included. One year warranty.

CRT Rejuvenator 490B

Designed to check and rejuvenate the cathode ray tubes (CRT) for both color and black-and-white television sets and monitors. Ability to find and repair leakage or shorts by measuring the RGB current of cathodes. Unit also able to plot voltage/current features and to rejuvenate each cathode separately. Test and restore color or monochrome CRT's, most computer monitor CRT's and most projection TV CRT's. Test emission, tracking, leakage, shorts and life. Continual set-up chart updates and new adapter development. Extra rugged carrying case. Includes instruction manual, set-up chart, spare fuse, three adapter sockets for several CRTs (CA23, CA24, CA31), adapter cable and high voltage anode cable. One year warranty.

BK PRECISION

Sound Meter 732

Whether you are testing for OSHA compliance, quieting equipment, or monitoring the roar of a stadium crowd, Model 732 can get the job done. Provides 30 ~ 130 dB capability in three convenient measurement ranges - Low, Medium and High - with an accuracy of ±1.5dB. Meets the IEC 651 Type II and includes frequency weighting A and C and fast and slow time weighing. Two auxiliary ports provide either AC output, 1Vrms full scale, or DC output, 10mV/dB. Four digit LCD, resolution 0.1 dB update cycle 0.5s. Electret condenser microphone with windscreen. Max/min function. Low battery indication. Includes instruction manual, battery, carrying case, calibration screwdriver and windscreen. One year warranty.

Deluxe EPROM Eraser 851

Heavy duty EPROM eraser that can simultaneously erase up to 40 twenty-four pin EPROM's. It is constructed of an all-metal case plus an advanced designed chip drawer that prevents UV radiation from being a hazard to the user. The chip drawer is lined with conductive foam to prevent electrostatic damage to the chips. Indicator light when erasing. Power safety switch inside the drawer shuts off unit whenever the drawer is opened. Large capacity. One year warranty. Includes AC power cord and manual.

EPROM ERASER 850

UV-EPROM eraser featuring small dimensions, high erasing efficiency and simple operation. Up to five EPROM's in 40-pin DIP packages can be erased simultaneously. A built-in timer is preset to an optimum erasing period. Includes AC/DC adapter, pad and manual. One year warranty.
