### Cyanoacrylate Adhesives & Debonders

19-115 GR-R-RIP

World famous Ethyl Cyanoacrylate rapid bonding adhesive. Bond strength not affected by temperatures from -112°F to +212°F (-80°C to +100°C).

### Solvent Release Adhesives Service Cements

10-302 2 fl. oz. bottle with brush  
10-310 1 gallon can

A quick-drying and waterproof clear adhesive which forms a strong, hard but vibration-resistant bond with minimal shrinkage. A true universal adhesive for shop, industry, home and hobby use. Ideal for speaker repairs. May also be used for gluing porous or semi-porous materials to each other or to metals, plastics, etc. Not suitable for metal-to-metal, glass-to-metal or other non-porous to non-porous surfaces, for which Perma-Bond, GR-R-RIP or epoxy cements are more suitable.

### General Purpose Plastic Cement

10-324 2 fl. oz. bottle with brush  
10-328 8 fl. oz. bottle with brush

A solvent-release adhesive with a special Nitrocellulose Lacquer Base. The bond is usually invisible and hard, but not brittle. Adheres especially well to plastics, paper, leather, ceramics and metal. Quick-drying and waterproof.

### Rubber-to-Metal Cement

10-352 2 fl. oz. bottle with brush

A heavy-bodied, black rubber-based cement with outstanding bonding qualities to many materials such as natural and synthetic rubber, metal, wood and plastics. Dries quickly and produces a lasting, flexible bond which often exceeds the strength of the material itself. Used to cement any rubber or flexible plastic part to cabinets, chassis or panels; also for gaskets, weather strips, etc.

### Acrylic Cement

10-4002 2 fl. oz. bottle with brush  
10-4008 8 fl. oz. bottle with brush

Consists of solvent for acrylics (plexiglass, lucite and others), slightly thickened with dissolved acrylic resin. It actually "welds" items made of plexiglass. The joint is usually invisible and stronger than the material itself. Cements many items used in electronics for decorative or functional purposes as well as acrylic signs, art objects and decorative pieces. Also has good adhesive qualities to such surfaces as wood, other plastics, cardboard and fibers.

## GC/Waldom

### GC Bond

10-4302 2 fl. oz. bottle with brush  
10-4308 8 fl. oz. bottle with brush  
10-4316 16 fl. oz. bottle

Thermoplastic adhesive based on synthetic components with unusually strong bonding characteristics to most materials. Produces a waterproof, resilient and long-lasting flexible bond. Light tan in color. GC Bond's uses range from cementing paper and cardboard to cementing electronic components to circuit boards and chassis. Sticks well to all metals and glass. Dries in 15 to 30 minutes.

### Epoxy Cements

#### Quick Stik

10-114 5 Minutes Set, Pkg of two 1/2 fl. oz. tubes

Clear, fast-curing epoxy adhesive. In view of its short pott life, use is recommended when a single repair must be made and the mixed adhesives can be used within one or two minutes. Cemented items can be safely handled within eight to twelve minutes, with full hardness obtained after several hours. This cement is relatively thin in consistency and should be used to cement closely matching surfaces. The glue line is usually invisible.

#### Epoxy Glue

10-347 5 Hours Set, Pkg of two 2 fl. oz. tubes

Provides an exceptionally hard and strong bond. Good dielectric properties. Gray-white in color with fillers added to increase viscosity and make it thixotropic (non-running). May be used to fill gaps to replace broken sections. Bonds may be over-filled and filed or sanded after cutting.

### GC Potting Epoxy

19-823 8 oz. kit  
19-824 500 grms. kit  
19-824-2G 2 gallon kit

Black opaque highly-filled epoxy used for potting and encapsulating electronic circuits. Use to environmentally protect or conceal circuits. Working time (Pott life), 1 hour. Mix ration: 1 to 1. Temperature range: -40° to 180°F.

# Adhesives/Sealants

## GC/Waldom

### Silicone Rubber Adhesive/Sealant 10-150

One-component elastomer cures to a tough, rubbery solid when exposed to moisture in the air. Designed to fulfill industrial and electronic service sealing and bonding requirements, this sealant has excellent adhesive strength, high elongation and outstanding insulation and heat resistance qualities. Develops primerless adhesion to a variety of materials, including metal, glass, most wood, silicone resin, vulcanized silicone, rubber, ceramic, natural and synthetic fibers; most plastics and painted surfaces. Resists weathering, vibration and exposure to oil, moisture, ozone, and temperatures from sub-zero to 450°F. Cures to a tack-free surface in 20 minutes. Full cure, 24 hours. Ideal for many sealing, bonding and insulating applications, including general electrical insulation, potting exposed electronic components, bonding gaskets for heating and refrigeration units, formed-in-place gaskets for gear boxes, compressors, pumps and outdoor motor covers, pressure sealing of aircraft cabins and cockpits, caulking sheet metal stacks, duct-work and equipment housings, and as an anti-abrasion coating.

### LOCTITE® Quicktite Super Glue

- LT-21309 Super Glue Liquid
- LT-26441 Brush-on Liquid
- LT-30379 Super Glue Gel
- LT-30622 Super Glue Liquid
- LT-82192 Super Glue Pen
- LT-82196 Super Glue Gel

This super glue has proven superior performance over ordinary super glues. Works faster and holds stronger than others thanks to a patented additive.

### LOCTITE® Poxy Pouches LT-82515

This unique "mix-in-pouches" system is a quick and simple way to use epoxy. With these pre-measured packets, just knead the contents for 10-15 seconds, snip off the end and apply. The epoxy sets in 4-6 minutes. Great for wood, hard plastic, fiberglass, metal, and china.

## LOCTITE® Products

### DURO Quick Gel Super Glue LT-81954

No run Quick Gel super glue. Works on wood, metal, rubber, plastics, vinyl, fabrics, and other such materials. The gel works best on porous and vertical surfaces with small gaps. Bonds in 15-30 seconds.

### LOCTITE® Quick Set Epoxy

- LT-81501 .85 fl. oz.
- LT-81502 (2) .5 fl. oz. tubes

Super high-strength, waterproof, sets in 5 minutes, and is solvent-resistant. Bonds to wood, metal, ceramic, glass, plastic and tile.

### DURO Super Glue LT-81742

America's favorite traditional super glue. Super strong, bonds in seconds. It is permanent and clear. Bonds in 15-30 seconds.

### LOCTITE® Contact Cement LT-85124

This tough, fast drying cement is great for bonding or laminating cardboard, ceramic tile, leather and rubber. It is heat and water resistant. Requires no clamping.

### LOCTITE® Threadlocker

- LT-24206 Removable Medium grade
- LT-27100 High Strength

These products lock and seal threaded parts against vibration loosening, corrosion, and rust lock. They may also be used as an anti-tamper indicator. They are available in several grades and put ups.

### LOCTITE® Superflex RTV Sealer

- LT-30806 Black 3 fl. oz. tube
- LT-30808 Clear 3 fl. oz. tube

These general purpose RTV sealants are useable indoor and outdoor. They seal, bond and secure on metal, glass, rubber and vinyl. They cure at room temperature and are safe on electrical wiring.

# Adhesives/Sealants

## LOCTITE® Handymans Choice LT-25827

This all purpose non-toxic adhesive sealant is strong, dries clear, water resistant, microwave safe and odor free. Use this product to mend brick, glassware, loose tile and shoe soles.

## LOCTITE® Spray Silicone LT-30809

This all purpose lubricant is great for many household uses. It will not stain or discolor. It provides an environmentally safe lubricant for locks, hinges, garage door openers, and many other uses.

## LOCTITE® Plastix Bonder LT-82565

This advanced plastic repair kit repairs any plastic-GUARANTEED! No mixing required. Just brush the surface with the activator and apply the fast-acting bonding agent. Formulated for vinyl, plexiglass, Phenolics, PVC, Styrenes, Acrylic, ABS and others.

## LOCTITE® Glass Glue LT-29175

This product works well on ALL glass. It bonds instantly and is dishwasher safe.

## LOCTITE® Mirror Adhesive Kit LT-30814

Use this two (2) part kit to attach mirrors to glass, plastic or metal. Great for attaching mirrors to windshields.

## LOCTITE® Stick'n Seal LT-23782

This waterproof all purpose adhesive bonds all surfaces subjected to water and moisture. Seals leaks, repairs tears, and secures tiles. Great on brick, aluminum, fiberglass, pool liners and rain slickers.

## DURO Stick With IT LT-81903

This fix-all adhesive is a multi-purpose waterproof adhesive for ceramics, glass, wood, plastics, styrene foam and rubber.

## DURO Clear Silicone Sealer LT-80242

This product provides permanent waterproof bonds for sealing and insulation. It withstands heat, solvents, and vibration. It dries clear.
